PROFESSIONAL SUMMARY

Self-motivated Software Developer and Data Science graduate with a strong foundation in building scalable, testable applications. Proven ability to design end-to-end systems and manage complex relational databases. A fast learner with professional experience in containerization and performance optimization.

EDUCATION

Bachelors of Science in Data Science 09/2021 – 06/2025
Ghulam Ishaq Khan Institute of Engineering Sciences and Technology (GIKI) Topi, Swabi

PROFESSIONAL EXPERIENCE

Freelance Web Developer/3D Artist 10/2025 – Present
Self Remote

- Designed realistic 3D assets for high-stakes simulation platforms.
- Coded custom web solutions and interactive user interfaces.
- Integrated complex 3D data into accessible web-based environments.
- Delivered optimized, performance-ready content for diverse digital needs.

Data Analyst Intern 07/2024 – 09/2024
Virtual World (ibex.co) Karachi, Pakistan

- Managed human-centric data workflows at a large-scale MNC to optimize organizational performance and ensure data integrity.
- Designed a centralized Employee Retention Dashboard using Metabase, PowerBI and Excel, improving visibility into human capital KPIs and reducing reporting turnaround by 46%.
- Collaborated cross-functionally to implement scalable data processes and reporting frameworks, improving accuracy by 25%.

PROJECTS

Data Driven State of Health Estimation of Lithium Ion Cells in EVs - Final Year Project 📄
• Built a predictive analytics dashboard to estimate battery SoH using real-time sensor data, enabling 25% faster identification of degradation trends.
• Applied machine learning models on voltage and temperature data, achieving 18% improvement in prediction accuracy over baseline methods.
• Developed an end-to-end pipeline using Python, FastAPI, React, and Arduino, reducing manual monitoring effort by 30%.

PakWheels ETL Pipeline
• Designed and containerized an end-to-end ETL pipeline using Docker Compose, reducing pipeline setup time by 40%.
• Processed and transformed raw data with Apache Spark into an analytics-ready Data Lake, improving data processing speed by 35%.
• Implemented Parquet storage to optimize query performance and storage efficiency, reducing query latency by 25%.

AirBnB Market Analysis
• Presented a comprehensive analysis of the AirBnB market using Power BI, focusing on designing a client-based dashboard that delivered informative insights.
• Examined and catalogued data using Excel, PowerBI, and Python.

Bus Ticket Reservation System
• Developed a reservation system that secured passenger details and stored them, and randomly produced bus rides, employing extensive use of DBMS concepts.
• Achieved desired results using resources such as SQL, Python, and Excel.

CERTIFICATES

Certificate of Appreciation - Career Fair 2022 GIKI
• Conducted the career fair event to successful completion with no issues as Event Head.

SKILLS

- | | | | |
|--|---|-------------------------|--|
| • PowerBI / Looker / Metabase / Superset | • Human Data Infrastructure | • SQL | • Python |
| • R Programming | • HTML/CSS | • Docker | • Data Mining / Analysis / ETL processes |
| • C++ | • Excellent and Effective communication | • Workflow Optimization | • Cross-Functional Collaboration |

INTERESTS

Golf | Sim Development | Swimming
